OneTouchPoint
https://www.securityweek.com/onetouchpoint-discloses-data-breach-impacting-over-30-healthcare-firms

Exploit: Ransomware

OneTouchPoint: Business Services

Risk to Business: 1.772 = Severe

OneTouchPoint, a provider of mailing and printing services, fell victim to a ransomware attack that has resulted in the compromise of personally identifiable information (PII) stored on its system. The company discovered encrypted files on some of its systems on April 28. It was later determined that the attackers had accessed its network on April 27 determined that the compromised systems contained PII provided by its customers.

Individual Risk: 2.335 = Severe

Exposed information includes names, addresses, birth dates, date of service, description of service, diagnosis codes, information provided as part of a health assessment and member ID. OneTouchPoint lists 34 healthcare insurance carriers and healthcare services providers that have been impacted, but the number appears to be larger.

How it Could Affect Your Business: This is going to end up costing this company a fortune in both incident costs and regulatory penalties.

NetStandard
https://www.bleepingcomputer.com/news/security/kansas-msp-shuts-down-cloud-services-to-fend-off-cyberattack/

Exploit: Ransomware

Risk to Business: 1.672 = Severe

Kansas-based managed service provider NetStandard suffered a cyberattack that resulted in the company pressing pause on its MyAppsAnywhere cloud services, consisting of hosted Dynamics GP, Exchange, Sharepoint and CRM services. The MSP detected signs of a cyberattack last Tuesday morning and quickly shut down cloud services to prevent the attack's spread. The company announced that only the MyAppsAnywhere services are affected, but news outlets report that the attack may have had a broader impact, with the company's main site shut down as well.

How It Could Affect Your Business: No information about consumer/employee PII, PHI or financial data exposure was available at press time.

WordFly
https://www.theregister.com/2022/07/26/wordfly_ransomware_attack/

Exploit: Ransomware

WordFly: Business Services

Risk to Business: 2.773 = Moderate

Email list provider WordFly has been the victim of a ransomware attack. WordFly's main website is unavailable and has been offline for the past two weeks. The company says that they discovered the problem on July 10. WordFly said that they believe that customer data was accessed but they didn't specify the nature of that data. The Smithsonian Museums, Canada's Toronto Symphony Orchestra and the Courtauld Institute of Art in London are among the company's clientele.

Individual Impact: No information about consumer/employee PII, PHI or financial data exposure was available at press time.

How it Could Affect Your Business: Ransomware attacks on service providers in the supply chain are an ongoing problem that won't be going away anytime soon.

DuPage Medical Group
https://www.fiercehealthcare.com/hospitals/dupage-medical-group-to-notify-patients-personal-information-may-have-been-breached

Exploit: Hacking

DuPage Medical Group: Healthcare Organization

\Risk to Business: 1.619 = Severe

Illinois-based DuPage Medical Group, an organization with more than 700 doctors in 100 locations, has been the victim of a cyberattack that exposed patient data. The incident occurred between July 12-13 and caused a network outage. An investigation determined that bad actors had likely accessed patient data. The medical group is notifying 600,000 patients that their personal information may have been compromised.

Individual Risk: 1.619 = Severe

Illinois-based DuPage Medical Group, an organization with more than 700 doctors in 100 locations, has been the victim of a cyberattack that exposed patient data. The incident occurred between July 12-13 and caused a network outage. An investigation determined that bad actors had likely accessed patient data. The medical group is notifying 600,000 patients that their personal information may have been compromised.

How it Could Affect Your Business: Healthcare is the industry with the highest data breach cost, and its' been beleaguered by ransomware.
