Not ready to talk yet? Visit our website to get your ***FREE Dark Web Scan***. You will get a free, no obligation scan sent to your inbox within 24hrs. ***Visit today: www.denbeconsulting.com***

DraftKings

<https://www.infosecurity-magazine.com/news/credential-stuffers-300k/>

Exploit: Credential Stuffing

DraftKings: Sports Betting Platform

Risk to Business: 1.106 = Extreme

Users of sports book platform DraftKings took a heavy hit last week with an estimated \$300k lost to a credential stuffing attack. A company official confirmed the attack in a statement, saying that they believe that the incident stemmed from customers reusing login credentials that had already been compromised elsewhere. Bad actors gained

access to several user accounts that they immediately took over, changing the passwords and enabling 2FA for a phone number they controlled. DraftKings has said that customers who lost money will be made whole but did not offer specifics.

How It Could Affect Your Business: This is not a good look during a busy time of year for sports betting with the World Cup ongoing and the U.S. football playoffs ahead.

Cincinnati State Technical and Community College

<https://www.bleepingcomputer.com/news/security/vice-society-ransomware-claims-attack-on-cincinnati-state-college/>

Exploit: Ransomware

Cincinnati State Technical and Community College: Institution of Higher Learning

Risk to Business: 2.843 = Moderate

The Vice Society ransomware group has added Cincinnati State Technical and Community College to its dark web leak site, releasing a trove of purportedly stolen documents ranging across the past two years. The school confirmed that it had experienced a cybersecurity incident that is still under investigation in early November. While class

schedules were not impacted, the school is still working to restore functionality in some of its communications systems. Financial aid services, network printing, VPN tools, department share drives, admission application platforms, transcript exchanges, grading tools and more were all still down as of last Friday. The release of the documents may indicate that the school did not pay the ransom that Vice Society demanded.

How It Could Affect Your Business: Educational institutions at every level have been hit hard by bad actors, and they're favored targets for Vice Society.
